

USE OF BLOOD DONATIONS FROM vCJD CASES

TRANSFUSED:	Red cells	27
	Leucodepleted red cells	25
	Buffy-coat reduced red cells	2
	Fresh frozen plasma	3
	Fresh frozen plasma (leucodepleted)	2
	Whole blood	2
	Cryo-depleted plasma	1
	Cryoprecipitate	1
	Platelets (pooled)	2
	Platelets (pooled, leucodepleted)	2

In addition, 11 vCJD donors (including one non-UK case who donated while residing in the UK) contributed plasma to 25 plasma pools identified by UK fractionators (BPL & PFC) as having been used for the manufacture of plasma products prior to 1999.
