

## **vCJD DONOR SUMMARY**

Number of vCJD cases in the UK <sup>1</sup>	178
Number who were eligible to donate (ie aged 17 and over)	168
Number reported by relatives to have been blood donors	31
Number of cases where donor records have been traced	24 <sup>2</sup>
Number of cases from whom components were actually issued	18
Number of recipients identified from 18 cases where recipient and component information is available	67

<sup>1</sup>Two non-UK cases not included in the above table had resided in the UK and were reported to have been blood donors while residing in the UK. Donor records were traced in the first but no issues were made. Donor records were traced in the second and it was established that components were issued but information on issues pre-dated available records.

<sup>2</sup>Donor records were traced on four where the relatives had reported the case not to be a donor.
